

Points for Evaluation for Presentation Round

Total 200 Marks of a given idea and it will be judged from the following criterion:

- **Originality of the Idea: (25 Marks)** We will use this criterion to judge using existing solutions and how the idea is different from them.
- **Architectural Design: (25 Marks)** Sturdiness of design using relevant architectural frameworks along with features like portability, coupling, reusability, etc.
- **UI Design: (25 Marks)** Attractiveness of the UI and User experience
- **Security: (25 Marks)** Encryption of the application data and the permissions required for the idea to perform its function.
- **Usefulness: (25 Marks)** Functionality and practicality of the application.
- **Sustainability: (25 Marks)** How the idea will be maintained and for how long. How it will retain its interests.
- **Scalability: (25 Marks)** The scale of impact of the application and how it will scale over time.
- **Market Viability: (25 Marks)** How the idea will perform in the real world compared to its competitors and the future plan for the idea.

Participants will have to submit their Github repositories along with the hab59 account added to their repositories as a collaborator. The participant will also have to demonstrate their working prototype of the project to the Jury members along with a presentation and a report whose format will be forwarded shortly.
